

Verity® Touch Writer

Accessible Ballot Marking

Equal Access + Vote

Provides True Equality of Access – Verity Touch Writer is a universal ballot marking device paired with a Hart-integrated COTS printer, which prints the same full-size paper ballot for all voters – no segregated ballots. The ADA compliant module is tethered to the unit and can be placed wherever it is easiest for the voter to use which enables independent, private ballot marking. Touch Writer also includes adjustable audio and contrast settings, compatibility with “sip-and-puff” devices (or other types of adaptive controls) and the voting booth provides easy wheelchair access. Verity Touch Writer makes voting better for everyone.

Best In Class Voter Experience

An Equal Experience

Identical, full-sized ballot for everyone.

Simple Voting Controls

Verity Touch Writer is equipped with a full range of accessibility features with a simple design that eliminates confusing and unnecessary buttons.

Easy to Read

Touchscreen interface with plain-language instructions inspired by EAC/AIGA Design for Democracy standards makes on-screen voting easier.

Straightforward Ballot Review

Voters can review the ballot summary at any time, and it's easy to change selections before printing the ballot.

Adaptive Device Integration

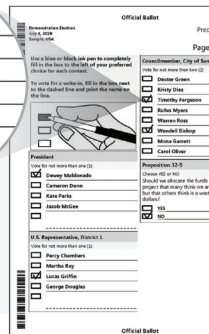

Personal adaptive devices such as jelly switches and sip-and-puff devices plug directly into the accessible module and seamlessly work.

“Hart’s accessible controls let me easily move through the ballot emotionally and physically. I didn’t have to work so hard to pick the right button like I did with the other system.”

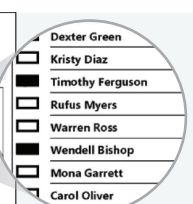

– William Greer
Accessibility User Group
March 2020

Ballots marked by Touch Writer are identical to ballots marked by hand—ensuring voter privacy and equality.
