

# VANGUARD™ CAPTURE

Centralized Scanning and Adjudication

## Verity Vanguard Delivers Next Generation Technology

DEFENSIBLE

EFFICIENT

ADOPTABLE

Vanguard Capture is part of the Verity Vanguard™ family of products that exceed VVSG 2.0 guidelines. Vanguard, a new platform for smart elections, was developed for defensibility, efficiency, and adoptability, enabling election officials to move faster at every step of the election lifecycle, and ensuring they can defend the outcomes of the elections that they oversee.

Capture enables election officials to manage absentee/by-mail ballots with ease using Vanguard's innovative, high-speed scanning and adjudication technology. As the only system with true onscreen adjudication, a technology pioneered and perfected by Hart, Vanguard Capture provides streamlined ballot processing that exceeds any alternative in the market. Scan ballots accurately every time with a complete record of all resolution decisions captured in an audit log for end-to-end transparency.

# Leading the Way in VVSG 2.0 Technology

Capture offers efficient digital scanning without presorting, clear on-screen adjudication with visual flags, and flexible workflows. It ensures transparent, accurate results with enhanced mark detection and robust reporting. Capture's scalable system allows for multiple workstations, saving time and improving auditability with optional imprinting technology.

## Simple and Transparent

Clear messaging and color-coded flags make it easy for ballot boards, members of the public, and community stakeholders to understand the adjudication process.

## Accelerated Adjudication

Capture offers speedier navigation with fewer keystrokes. A single click takes you to the next unresolved issue, ballot, or batch.

## Complete Control

Assign flexible and specific permissions for scanning and adjudication. You determine which mismarks are accepted or which will require adjudication.

## Scalable Set Up

Choose the right number of scanners and workstations for your size and budget. Cost-effectively add additional networked scanning stations at any time.

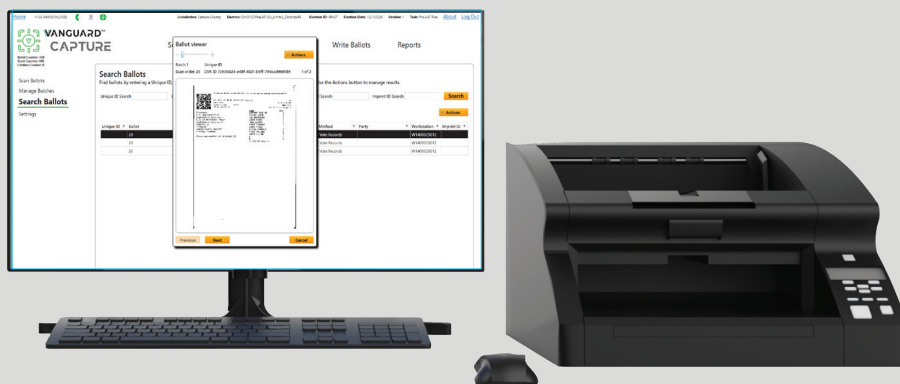

## No Extra Work

No outstacking, rescanning, presorting, and no header cards needed— just an efficient workflow. Scan multiple precinct styles/ languages in the same batch, in any orientation.

## Flexible Workflows

Capture enables total flexibility in workflows and independent task management without interruptions. Some team members can scan while others adjudicate, simultaneously.

Perfected by Hart, Capture supersedes any alternative in the market, offering Election Officials comprehensive digital scanning, clear on-screen adjudication, flexible, scalable, efficient workflows, and transparent, accurate results.
