

VANGUARD™ ID

Patented, "Always-On" Smart Label

BOOST

REFLEX

TUNN

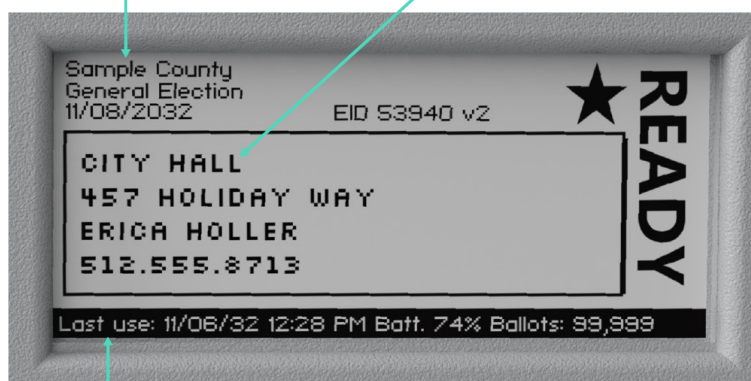

Vanguard ID is an intelligent external display that leverages e-ink technology to display essential election information on all Vanguard devices. The Vanguard ID smart label provides instant, visibility into critical device information, even when the device is powered off.

Only Vanguard ID automates critical chain of custody and device tracking information.

Election Information

Polling Place Info

Last Time Device Was Used

Innovation You Only Get with Vanguard

No other voting system provides an always-on label on every device. Vanguard ID removes manual tracking and enhances usability, transparency, and auditability even in the warehouse when devices are powered off.

Vanguard ID: Save Time. Reduce Errors. Strengthen Every Election.

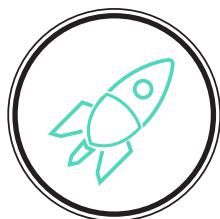

Save Time

Eliminate labeling and tracking with automated, real-time device information.

Simplify Polling Place Setup

Avoid delays on Election Day by providing “at a glance” verification of device assignments before set up begins.

Eliminate Errors

Replace handwritten labels with accurate, device-generated data you can trust.

Transparency

Critical election information is visible on every device, providing immediate confidence in system readiness and integrity.

Security & Auditability

Provides verifiable device status and strengthens chain of custody from poll closing through return.

Support Defensible Elections

Human-readable device information helps officials demonstrate elections are conducted securely, accurately, and without error.

Configure Vanguard ID to Your Exact Chain of Custody Needs.

Vanguard’s Workspace election management software makes it easy to configure Vanguard ID to your exact needs. Vanguard ID is configurable and allows Election Officials to control what information appears on Vanguard ID and when, aligning with your security protocols and workflows.

Only Available with Hart’s Vanguard Voting System

Vanguard ID delivers patented, always-on visibility that saves time, reduces errors, strengthens security, and helps officials confidently manage and defend every stage of the election process.

The screenshot displays the 'VANGUARD™ DEPLOY' interface. The top navigation bar includes 'Home', '11:10 AM 04/23/2024', 'Jurisdiction: Sample County', 'Election: General Election 2024', 'Election ID: 56360', 'Election Date: 3/29/2024', and links for 'About' and 'Log Out'. The main menu has 'Select Election', 'Proof Ballots', 'Configure Settings' (highlighted), and 'Create'. On the left, 'Device Users' is expanded, showing 'Election Settings' and 'Accept Election'. The 'Election Settings' section is titled 'Configure election settings for application and device options.' and includes tabs for 'Printed Ballots', 'Voting Type Setup', 'Device Reports', 'Device Passcodes', 'Device Settings', 'Vault', 'Flex', 'Boost', and 'Vanguard ID'. Under 'Set Smart Label options for Vanguard ID', there are five columns of settings for different display states: 'Display during configuration', 'Display during ready to open', 'Display when polls are open', 'Display when polls are closed', and 'Display when polls are suspended'. Each column has checkboxes for 'Jurisdiction Name', 'Election Name', 'Election Date', 'Ballots Cast', 'Polling Place Name', 'Polling Place Address', 'Contact Name', and 'Contact Phone'. At the bottom, there are five placeholder boxes for images, each with 'Add Image' and 'Remove' buttons. A 'Save' button is in the bottom right corner.
