

VANGUARD™ | ACCESSIBILITY

One System Provides Independence for Voters and Poll Workers

Voters deserve to vote privately and independently. Poll workers deserve technology that makes accessibility simple to support and easy to use.

Verity Vanguard™ Delivers Both.

Vanguard accessibility exceeds VVSG 2.0 guidelines and is built into every device and workflow, creating a consistent, intuitive experience across the entire election process. From poll worker setup to voter ballot marking and scanning, to election staff tabulation, and results management - accessibility is not an add-on. It is inherent across the system.

Universal Ballot Marking

Efficient Ballot Management

Secure Ballot Scanning

Independent All-In-One

Accessible Solutions for Every User

Voter-facing devices: Flex and Vault

**Election staff and poll workers:
Boost, Workspace**

Vanguard was designed in partnership with nationally recognized accessibility organizations, including HAVA, and ADA. All products exceed the accessibility requirements and Workspace meets WCAG requirements as part of federal law Section 508.

One Accessible System. Smoother Elections.

Empowering Voters

Vanguard supports every voter through built-in accessibility that adapts to each user. Voters can customize accessibility settings once, and those settings remain consistent throughout the voting session, regardless of device.

Customizable Preferences

Font size, contrast, language, audio speed, and volume.

Multiple Input Methods

Touchscreen, accessible controls, and personal sip and puff devices.

Simplified Accessible Controls

Simple, yet feature-rich audio-tactile interface (ATI).

Physical Access

Wheelchair-accessible voting devices, including scanners.

Privacy

Screen Controls and Audio Voting.

Empowering Poll Workers and Election Staff

Poll workers manage complex Election Day tasks. Vanguard simplifies operations with intuitive, accessible design across every device reducing interruptions and eliminating separate equipment.

- No tracking of accessible units
- Fewer voter adjustments
- Simple, consistent controls
- Ergonomic design

Workspace software provides accessible lifestyle tool, meeting WCAG and Section 508 requirements to improve efficiency and confidence in results.
