Advancing Democracy

Hart InterCivic helps state and local governments conduct secure, accurate, and reliable elections.

All prices are effective, as of June 2018.

If you still can't find exactly what you need, call 866.216.4278

As always, we welcome the opportunity to serve you.

Equipment Summary

eScan

The eScan is a precinct-based digital scanner that ensures secure, accurate and reliable paper-based voting. Providing second-chance voting, dual-sided scanning, and fast flexible reporting, the eScan is the choice of voters around the country.

Judge's Booth Controller (JBC)

The JBC is the polling place control console that ensures correct ballot information is transmitted to each of the eSlates. It also serves as an electronic ballot box, with printing and reporting capabilities.

eSlate and DAU eSlate

The eSlate voting machine allows voters to cast electronic ballots by turning a rotary SELECT wheel. Specially modified Disabled Access Unit (DAU) eSlates allow voters with disabilities to use headphones or other adaptive devices to vote privately and independently.

Verifiable Ballot Option (VBO)

The VBO works with the eSlate to automatically create a paper audit trail as a voter completes an electronic ballot. The voter can review a paper summary of the ballot choices before the vote is cast.

eScan

The eScan is Hart's fully integrated digital ballot-imaging unit for polling place voting. It uses paper ballots produced by the Hart Voting System Ballot Now software and stores votes on an election-specific flash memory card. Second Chance Voting, dual-sided scanning and jurisdiction-wide election reporting are all supported.

Includes:

- 1 eScan scanner*
- 1 eScan ballot box*
- 1 PC card (MBB)
- 1 power supply
- 1 power cord
- 2 paper rolls

\$3,960.00 each*

Part number 1001-695-U

*only used units available

Judge's Booth Controller (JBC)

The JBC is the polling place control console that manages as many as 12 eSlate voting units. Using election data on a PC memory card called a Mobile Ballot Box (MBB), the JBC controls the ballot styles displayed on the eSlate, ensuring that every voter receives the correct ballot. Results can also be printed from the device.

Includes:

- 1 JBC 1000B*
- 1 PC card (MBB)
- 1 power cord
- 2 battery packs
- 1 serial connection cable
- 2 paper rolls

\$2,200.00 each

eSlate Booths

The eSlate booth's hard case serves both as a polling place voting station and as a collapsible storage unit for eSlate voting devices.

Standard Booth—Assures private, comfortable, independent voting and secure storage and handling for the eSlate, DAU, and VBO voting devices.

DAU Booth—Designed for wheelchair access, including wide-set legs, a steeper angle of view, and lower height. The booth is compliant with the accessibility requirements of the Help America Vote Act of 2002 (HAVA).
