Verity Touch with Controller — a one-of-a-kind DRE model, trusted since 2002

Unique, proven model

Since Hart introduced our unique controller model for centrally managed DRE voting, millions of voters have cast their ballots on Hart DRE devices. Verity builds on our first-generation solution to bring even more flexibility and efficiency to voting electronically.

How it works

Verity Controller provides centralized command and control of up to 12 connected Verity Touch DRE voting terminals.

Ease and efficiency in the polling place

1. Open polls on all terminals from a single console.
2. Easily monitor the status of each voting booth.
3. No need to escort the voters to the booths.
4. Close polls on all devices at once.
5. Report totals for all devices in just one step.

“The benefits of Hart’s polling place controller model are enormous. Our poll workers will no longer be required to administer every voting device separately for every election. This will reduce risk, reduce errors, and increase efficiency in getting our election night results.”

– Vicki Shelly, Elections Administrator, San Jacinto County, Texas

Easy.

Versatile.

Trustworthy.

Ideal Solution for Convenience Voting

Vote centers and early voting are convenient for voters and efficient for election administrators.

With Verity, you get:

- Easy management of hundreds of ballot styles
- Flexible setup for best traffic flow
- Fast, secure results reporting

Voters

Confident voting

Marking accurate choices is quick and easy with intuitive navigation and plain-language instructions.

Flexible settings for voter ease

The voter can change the language, text size and screen contrast at any time during the voting process.

Accessible independence for all voters

A lightweight, detachable tablet accommodates anywhere voting. And the Verity Access audio tactile interface (ATI) provides audio ballots with volume and speed controls, adaptive device compatibility, and Braille.

Election Managers

Centralized management — fast and easy

Connect up to 12 Verity Touch units with Verity Controller, and monitor the status of every unit from a central console. Open and close polls on all devices at once. Report totals in just one step – no need to gather data from each individual machine.

Streamlined workflows

Even provisional ballots are electronic – no separate ballots to manage.

Protection for cast vote records

Cast votes are stored in three physically separate locations.

Poll Workers

Simple transport and setup

Compact and lightweight, Verity Touch travels easily in ordinary vehicles and is easy to set up at the polling place.

Easy to learn and use

Simple, plain-language onscreen instructions make learning Verity easy.

Automated ballot style assignment

Assign the correct ballot style for every voter, using Verity's AutoBallot option – it integrates with almost any electronic poll book.

Faster election results

Election Night tasks are completed earlier, so results are ready in a hurry.

Only Verity uses AIGA Design for Democracy templates; its plain language interface is the easiest to use.

Warehouse

Shrinks storage space requirements

Compact, stackable units minimize the warehouse footprint.

Reduces warehouse labor to a fraction

No need to configure every individual voting device for every election. Configure just one device - Verity Controller – for each polling place.

Easy delivery

Verity Touch's compact size and light weight mean minimal manpower and muscle are needed for delivery.

The ONLY all-new, centrally managed DRE

Built on the best features of Hart's acclaimed eSlate® – and 10+ years smarter – Verity Touch with Controller streamlines electronic voting.

The Future of Elections

Hart InterCivic is a full service elections solutions innovator, partnering with state and local governments to deliver secure, accurate and reliable elections.

Versatile for long-term value

Verity Touch with Controller easily manages hundreds of ballot styles, so you can use it in a variety of voting scenarios. And if your needs change, Verity is right there with you.

Lower total cost of ownership

Compact size saves storage space and reduces transportation costs. Easy setup at the polling place means lower staffing costs. And Verity Touch with Controller requires very little maintenance.

Built to last

Early in its lifecycle with a robust new supply chain, Verity Touch with Controller promises many, many years of cost-effective service.
